

Frequently Asked Questions

Horry County Water and Sewer Infrastructure Application

Are recordings of the overview available?

Recordings are posted to the following web page:

<https://www.horrycounty.org/Video/All>

Which entities are eligible to submit applications?

Eligible entity requirements for both the Public Services and Housing program and the Water and Sewer Infrastructure program are listed in the respective applications. Both programs are designed to support projects that provide direct services to communities in unincorporated Horry County. For the Water and Sewer Infrastructure the applicant may vary depending on the entity that is providing the water or sewer service – a municipality or special purpose district, etc.

Could you clarify energy projects falling under water? Does the energy project have to support water infrastructure or does this suggest separate energy projects are accepted?

An energy conservation project would need to support water infrastructure. Stand-alone energy projects are not eligible.
