

Comprehensive Emergency Management Plan

Section 6-Hurricane Annex

January 2024

Blank Intentionally

Annex 6 – 2 Hurricane Annex

I. PURPOSE

The purpose of this annex is to supplement the Horry County Emergency Operations Plan by establishing procedures specific to response operations during a hurricane or tropical system. Special emphasis is placed on the use of the operational conditions and evacuation to increase the safety of the citizens of Horry County.

II. SITUATION

The Atlantic hurricane season is June 1st through November 30th, during such time Horry County is on heightened alert to the possibility of approaching tropical systems. On a day-to-day basis the Horry County Emergency Management Department continually monitors the current weather affecting the county as well as weather conditions and systems that may impact the county in the foreseeable future. There are a number of weather related resources that assist in the identification of weather related conditions, such as: The National Weather Service, The National Hurricane Center, and a suite of tools and predictive models.

The department transitions from normal, day-to-day operations to a state of heightened situational awareness when models indicate that an approaching weather system, whether an actual or anticipated tropical depression, tropical storm or hurricane could impact the Horry County coast.

Hazard and threat analysis information is maintained as part of the Horry County All Hazards Mitigation plan. Identified in the threat analysis are high-risk areas (i.e., population, infrastructure and environmental).

III. ASSUMPTIONS

- A. Horry County will generally receive several days of early warning of an impending hurricane through the National Hurricane Center (NHC), the National Oceanic Atmospheric Administration (NOAA), and the National Weather Service (NWS). There is potential for response to a storm with less than normal warning time as seen in 2004 when Hurricane Gaston developed 140 miles off the South Carolina coast intensifying from a tropical depression to hurricane in 48 hours.
- B. Horry County will use this warning time to prepare using plans, protocols and procedures predefined and coordinated in this and other plans.
- C. Mutual Aid Compacts and Agreements will enable assistance in shortfall areas of personnel, equipment and logistics; state-to-county, county-to-county, and county-to-municipality.
- D. Horry County Council shall declare a State of Emergency to temporarily suspend normal government functions.
- E. The citizens of Horry County will respond to an evacuation order or otherwise prepare themselves for an approaching hurricane.

- F. A hurricane may trigger only a State and local response without a Federal response.
- G. Effective communications shall be a major concern due to the disruption of telephone service and the loss and/or damage of radio antenna towers and related equipment.
- H. A hurricane may result in large numbers of casualties and/or displaced people that will very quickly overwhelm local and State capabilities.
- I. There will be increased security in evacuated areas to prevent looting.
- J. Resources will be critical due to an increase in demand from surrounding counties.
- K. Both response and recovery operations may be hampered by blocked roads, damaged bridges or roads, and downed trees and utility poles.

IV. CONCEPT OF OPERATIONS

A. General

1. This plan is used in conjunction with the responsibilities outlined in the Emergency Operations Plan and its annexes.
2. Groups and individuals responding for hurricane operations will do so generally using procedures parallel to their normal day-to-day operations.

B. Operating Conditions Levels (OPCONS)

1. Horry County shall use Operating Condition Levels as the overall tool for hurricane planning and response, thus facilitating the action of both emergency management and emergency response personnel.
2. Due to the nature of hurricane planning and the need to facilitate a possible coastal evacuation, traditional OPCON Levels must be modified for this plan. This modification helps to implement a coastal evacuation and shelter activations well before the system makes land-fall. The Operating Condition Levels (OPCONS) are based on timing required to begin and complete an evacuation of the hurricane evacuation zones (Attachment B). Evacuation of appropriate coastal zones must be complete prior to the arrival of tropical storm force winds. Therefore the evacuation decision must be made in some instances days prior to landfall. Periodically, a tropical system will intensify rapidly; which will require flexibility in the transition between OPCONS. See the Horry County Evacuation Decision Timeline (Attachment A).
3. To ensure that all activated personnel in the county, northern conglomerate and the state have a unified response, the previous OPCON modifications were also coordinated with the State Hurricane Plan.

OPCON 3

June 1st is the first day of hurricane season. Horry County will remain at OPCON 3, day-to-day operations, until the National Hurricane Center identifies a tropical system that places Horry County within the five day error cone. Reference the EOP, Preparedness Section for pre-storm preparedness activities.

Emergency Management Department

- a) Daily monitor the National Hurricane Center, (NHC) Atlantic Graphical Tropical Weather outlook website.
- b) Monitor further development of NHC identified areas of possible tropical cyclone formation.
- c) Communicate internally with Horry County Senior Staff.
- d) Email County Stakeholders’ distribution list of general information if a storm is named.
- e) Monitor and update website and social media applications.

NHC FIVE DAY ERROR CONE FORECAST

Once the National Hurricane Center identifies a tropical system that places Horry County within the five day error cone, key personnel are notified of the possible threat and initiation of preparatory activities should be considered. The EOC will not be activated at this stage.

County Administrator

- f) Update Horry County Council on the actions being performed by county agencies and departments.
- g) Consider activation of the EOP and Hurricane Annex as recommended by the EMD Director.

Public Information

- h) Update the Horry County Government website with press releases and local advisories.
- i) Encourage Special Needs evacuation preparations.
- j) Monitor and update website and social media applications.

Emergency Management Department

- a) Review the advisory package forecast data. Determine projected evacuation timelines.
- b) SCEMD led conference calls with coastal counties and National Weather Service.
- c) Send out emails after each NHC package update of track and forecast.

- d) Sign in and follow NWS chat.
- e) Discuss and coordinate current situation and future actions with the following agencies:
 - i. SCEMD
 - ii. NWS, Wilmington
 - iii. Georgetown County Emergency Management Department
 - iv. Marion County Emergency Management Department
- f) Discuss, coordinate and update on current situation and future actions with local municipalities:
 - i. Town of Atlantic Beach
 - ii. Town of Aynor
 - iii. Town of Briarcliffe Acres
 - iv. City of Conway
 - v. City of Loris
 - vi. City of Myrtle Beach
 - vii. City of North Myrtle Beach
 - viii. Town of Surfside Beach
- g) Update Brunswick and Columbus Counties, North Carolina on the current status of Horry County OPCON level.
- h) Establish an event in Palmetto.
- i) Contact the area Chamber of Commerces and the Clay Brittain Jr. Center for Resort Tourism to verify the tourist profile, scheduled special events, etc.
- j) Check scheduling and determine who is scheduled to use the EOC. Notify them that they are subject to be rescheduled.
- k) Consider notification through EOC alert roster.
- l) Participate in Department of Health and Environment Control, (DHEC) led nursing home conference calls.
- m) Update county departments that may be most affected by the tropical system hazards as appropriate.
- n) Advise EMD staff to prepare for possible OPCON 2.

Maintenance

- a) Check emergency generator at M.L. Brown building and E911 Center. Ensure fuel tanks are full.

Law Enforcement

- a) J. Reuben Long Detention center to review procedures to draw down detainee population.

OPCON 2

Once Horry County is in the three day error cone, Horry County will move to OPCON 2. The EOC will be activated at this level, either at a partial or full status. The primary events that will occur will include evacuation discussions, conducting pre-evacuation conferences, intelligence and information gathering, resource management and other preparatory activities.

Executive Group

- a) Discuss possible evacuation options with the Governor, municipal leaders, state and federal delegation and if appropriate make a recommendation for evacuation.
- b) County Administrator to coordinate with County Council to prepare a draft “State of Emergency”.
- c) Preliminary discussion and evaluation of emergency ordinances.
- d) Coordinate with the Human Resources Director regarding canceling leave for all essential personnel and closure of government functions and facilities.
- e) Consider activation of resources contract based on recommendation by EOC Manager.

Emergency Management

- a) Recommend implementation of the EOP and Hurricane Annex.
- b) Recommend the activation of the EOC, based on the situation; determine if partial or full activation is required.
- c) Review the advisory package forecast data. Determine projected evacuation timelines.
- d) Discuss and coordinate current situation, future actions and potential evacuation zones with the following agencies:
 - i. SCEMD
 - ii. NWS, Wilmington
 - iii. Georgetown County Emergency Management Department
 - iv. Marion County Emergency Management Department
- e) Discuss, coordinate and update on current situation and future actions with local municipalities. Be prepared to discuss local issues that might impact the evacuation, such as local festivals, golf tournaments, road construction, etc.
 - i. Town of Atlantic Beach
 - ii. Town of Aynor
 - iii. Town of Briarcliffe Acres
 - iv. City of Conway
 - v. City of Loris
 - vi. City of Myrtle Beach
 - vii. City of North Myrtle Beach
 - viii. Town of Surfside Beach

- f) Update Brunswick and Columbus Counties, North Carolina on the current status of Horry County OPCON level.
- g) Recommend activation of emergency logistical support contract to Executive Group, as appropriate.
- h) Encourage departments/agencies to begin documenting hours and activities in each department.
- i) Send a resource request to SCEMD for a National Guard Liaison Officer for the EOC.

ESF 1 – Transportation

- a) Coordination with CoastRTA regarding evacuation pick-up points.

ESF 2 – IT/Communications

- a) Establish the Amateur Radio Net, primarily with EOCs and hurricane evacuation shelters in the county.
- b) Activate the EOC phone bank and the Joint Information Center phone lines.
- c) Setup up iRISS with the event, in order to start receiving significant events and road closure information.

ESF 3 – Public Works/Engineering

- a) Check the evacuation routes and verify that they are prepared for maximum traffic volume. Report any problems that could affect the evacuation.
- b) Ensure all critical vehicles and equipment are at a ready state.
- c) Maintenance to prepare for closure and securing of government buildings.

ESF 4 – Fire/Rescue

- a) Coordinate the movement and/or protection of fire equipment during the storm's impact.

ESF 5 – Information and Planning

- a) Will utilize HurrEvac, HAZUS, and SLOSH to develop and provide timely and accurate actionable intelligence.

ESF 6 – Mass Care

- a) Coordinate the possible opening of hurricane evacuation shelters, special medical needs shelters, and critical transportation need pickup/evacuation. Verify Horry County shelters are capable of sustaining operations and required personnel are notified if in county shelters are to be used.

- b) Discuss with school district officials shelter schedule modifications and school closings.
- c) If county shelters will be opening, communicate with the SCEMD and Transportation Management Services for critical transportation need evacuation and support. (Notification must be made 60 hours in advance of evacuation start time)
- d) If county shelters will be opening, make request through SCEMD to have staff brought down to run the CTN Collection point.
- e) If county shelters will be opening, complete SCEMD’s table for CTN evacuees.

ESF 7 – Resource Support

- a) Review food operations for the EOC and consider activation of the caterer per resources contract.
- b) Communicate to County staff about the Hazardous Weather and Emergency Leave policy decisions.
- c) Consider implementing the Logistics plan.
- d) Consider implementing emergency procurement procedures.

ESF 8 – Public Health

- a) Monitor possible evacuations of hospitals and nursing homes, if applicable

ESF 13 – Law Enforcement

- a) Discuss security measures pre and post storm.
- b) Develop a security plan for evacuation zones.
- c) SCDNR to determine closing times for Intracoastal Waterway turn-bridges.

ESF 16 – Emergency Evacuation

- a) Prepare to implement the traffic evacuation procedures.
- b) Coordinate the additional resources for evacuation traffic control points, if applicable.

ESF 22 – Air Operations

- a) Prepare to implement procedures for evacuation for commercial and private aircraft.
- b) Prepare for closure and securing of airport facilities.

ESF 24 – Business and Industry

- a) Coordinate with local businesses regarding the situation.
- b) Identify major events and special activities that could impact the evacuation.
- c) Consider coordinating with directors of special public activities and events.

OPCON 1

Once an evacuation is ordered by the Governor, the OPCON automatically moves to OPCON 1. At this level, the primary activity will be the evacuation of the vulnerable populations and hurricane evacuation shelter management. The EOC will remain at full activation throughout the evacuation and landfall.

Executive Group

- a) Implement closure of county facilities, as appropriate.
- b) Consider limiting the response of high profile and light weight emergency service response vehicles when sustained winds are 40 mph as conditions are too dangerous.
- c) Consider suspending all emergency service responses when sustained winds are 60 mph as conditions are too dangerous.

Emergency Management

- a) Discuss and coordinate current situation and future actions with the following agencies:
 - i. SCEMD
 - ii. NWS, Wilmington
 - iii. Georgetown County Emergency Management Department
 - iv. Marion County Emergency Management Department
- b) Discuss, coordinate and update on current situation and future actions with local municipalities.
 - i. Town of Atlantic Beach
 - ii. Town of Aynor
 - iii. Town of Briarcliffe Acres
 - iv. City of Conway
 - v. City of Loris
 - vi. City of Myrtle Beach
 - vii. City of North Myrtle Beach
 - viii. Town of Surfside Beach
- c) Update Brunswick and Columbus Counties, North Carolina on the current status of Horry County OPCON levels.

ESF 2 – IT/Communications

- a) Monitor the status of all communication systems. Coordinate for immediate repair or replacement following landfall.

ESF 3 – Public Works/Engineering

- a) Complete actions to protect critical county facilities and infrastructure.
- b) Move and disperse equipment to safe areas, as required.

- c) Begin planning for debris management following impact.
- d) Monitor the evacuation and ensure traffic moves as rapidly as possible.
- e) Begin preparations for an immediate assessment for the road network following the storm's impact.
- f) Review the priority for assessing and clearing the roads. (Attachment E)

ESF 4 – Fire/Rescue

- a) Move equipment to safe areas, as required.
- b) Develop a plan for post impact search and rescue of the impacted areas.

ESF 6 - Mass Care

- a) Monitor the status of the evacuation shelters and critical transportation need evacuation. Determine if supplemental evacuation shelters are necessary. Coordinate closely with other agencies.
- b) Document shelter occupancy levels for hurricane evacuation shelters/host-county shelters and special medical needs shelters.
- c) Begin planning for the transition from hurricane evacuation shelters to post-impact shelters.
- d) Begin preparing for repatriation of critical transportation need evacuees from county shelters or from host-county shelters.

ESF 7 – Resource Support

- a) Identify possible staging areas.
- b) Identify resource needs.

ESF 8 – Public Health

- a) Monitor the evacuations of Grand Strand Medical, Waccamaw Hospital and nursing homes.

ESF 13 – Law Enforcement

- a) Monitor the evacuation routes and maintain maximum traffic flow.
- b) Review and plan to implement re-entry.
- c) Plan for post-impact security requirements.

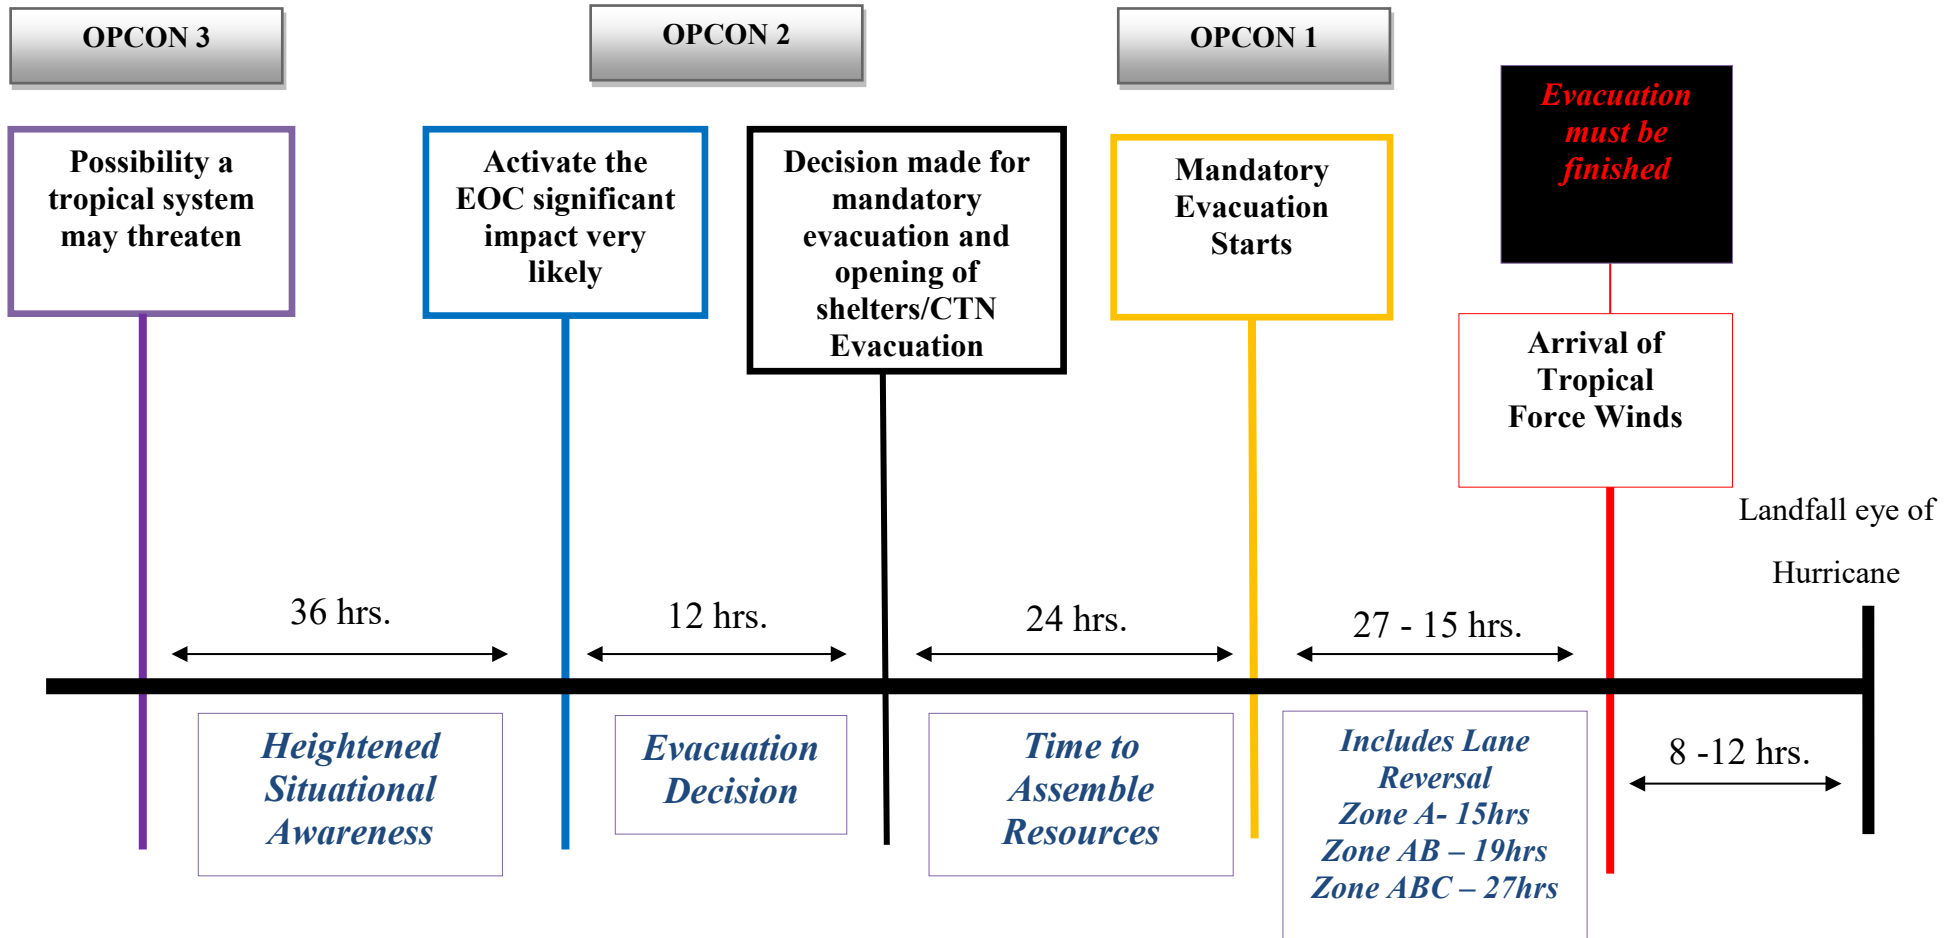

V. ANNEX MAINTENANCE

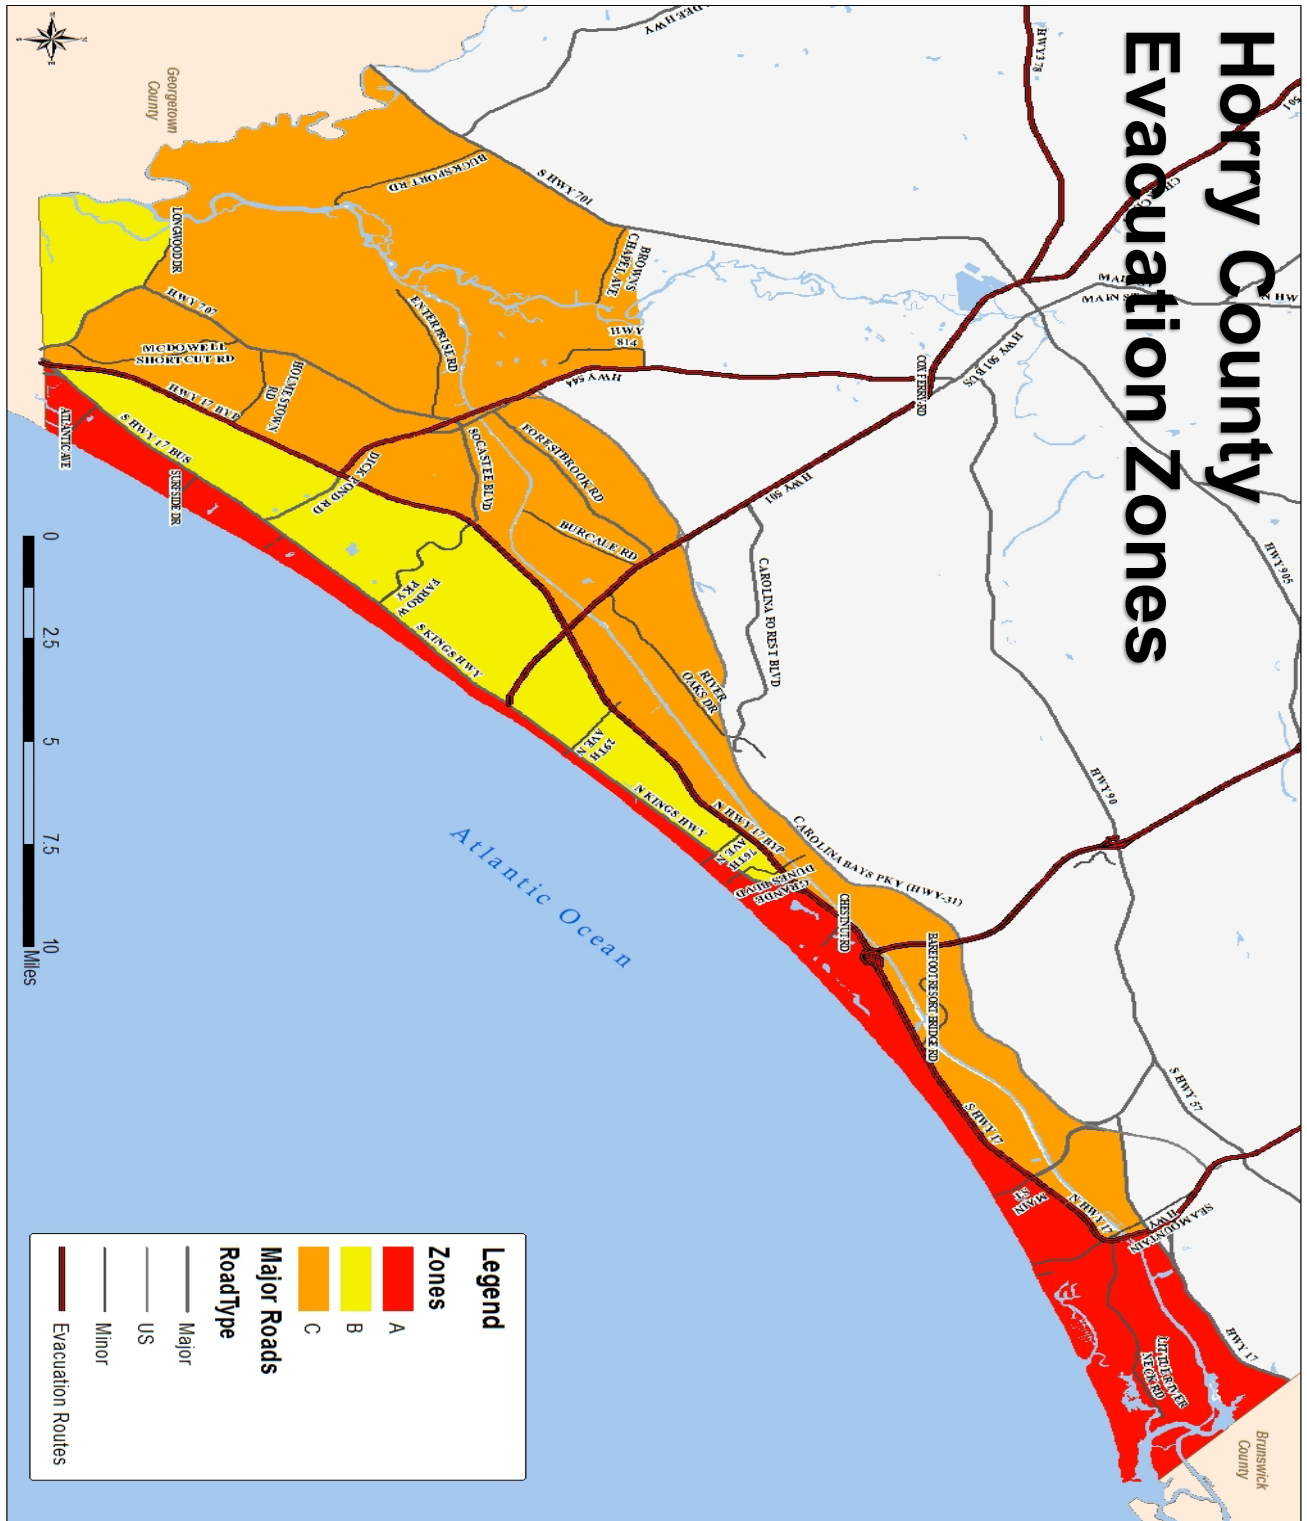

Horry County Emergency Management has the responsibility of coordinating, developing and maintaining the Hurricane Annex and is the designated Lead Agency. The Hurricane Annex will be updated in conjunction with the CEMP as stated in Section VII, Plan Development and Maintenance. It is important to remember that all sections of this plan are dynamic and subject to change to address any needs or to resolve any problems as they may arise during the course of the year.

Emergency Management Department

RANDALL S. WEBSTER

Hurricane Sheltering for General Population

This attachment provides a framework for establishing, opening, and demobilizing hurricane shelters to be used for pre-land falling hurricanes for the general population once a mandatory evacuation order is issued by the Governor or HCEMD deems an emergency shelter necessary for emergency situations. This attachment does not address sheltering in any other capacity.

Horry County is vulnerable to the storm surge produced by tropical systems. Hurricane sheltering is generally tied to the anticipated evacuation due to hurricane storm surge and is coordinated with the South Carolina Emergency Management Division along with the Governor's Office. Hurricane shelter facilities will not be located in any known storm surge zone nor mapped flood zone in Horry County.

1. Hurricane shelter coordination between Horry County Emergency Management, Horry County School District, CoastRTA, DSS and the American Red Cross will be done on an annual basis before the beginning of each hurricane season.
2. Discussions regarding opening shelters will begin as soon as there is a recognized threat of storm surge in Horry County. These discussions will include the current forecast, potential impacts to evacuation zones, anticipation of when a mandatory evacuation order may be issued, and whether or not an emergency shelter will be necessary if no mandatory evacuation order is issued.
3. Preparations to open may begin at the designated hurricane shelters or emergency shelter once it is determined that the Governor may issue a mandatory evacuation order or due to the threat of an approaching tropical system.
4. During hurricane evacuation sheltering, the shelter capacity totals are reflected in the first column in the tables below and are 20 square feet per person. For hurricane evacuation sheltering during pandemic operations, the shelter capacity is reflected in the second column in the tables below and is 60 square feet per person. Hurricane evacuation shelters will be opened in the following sequence:

1. All Main Shelters will open at the start of Governor ordered Hurricane Evacuation start time. This will include Ocean Bay Middle School, which will be the facility, used for CTN (Critical Transportation Need) shelterees.
2. Upon assessment by the Emergency Management staff, ESF 6 partners, and Horry County School District, the Reserve Shelter list will be activated on an as needed basis. Generally speaking, the Main Shelters will have hit a capacity of 60% before the additional reserves will open.
3. During pandemic conditions, three additional shelters will be available as extra reserve shelters and will serve as a third tier of available locations for sheltering residents. Horry County Emergency Management added the additional reserve shelter tier to offset capacity loss in the Main and Reserve shelter list, due to pandemic conditions and guidance from the Red Cross. The activation of these shelters will follow the normal process outlined in step 2 and will occur when the reserve shelters have hit a capacity of 60%.
4. Should an evacuation order not be issued by the Governor and HCEMD believes, based on anticipated storm impacts, that an emergency shelter is necessary, a request will be submitted through Palmetto to establish an emergency shelter in Horry County. The request will include staffing from both the Red Cross and DSS. HCEMD anticipates opening at least one (1) centrally located emergency shelter for tropical system events that do not include a mandatory evacuation by the governor. For non-school sheltering, Carolina Forest Recreation Center has been identified as the primary shelter to be opened. Depending on the nature of the impending threat, additional shelters may be necessary.
5. Shelter operations will be governed by the multi-agency agreements in place at the time the shelters are activated.
6. Overall coordination of sheltering and mass care will be organized through Emergency Support Function (ESF6) in the Horry County Emergency Operations Center.
7. Red Cross is the lead ESF 6 partner and the organization responsible for Hurricane shelter management and operations.
8. During shelter operations, regular updates of the status of each shelter including the current number of people located in the shelter shall be provided by ESF 6 to the EOC Section Liaison, EOC Manager or Emergency Management Director.
9. Issues that arise during shelter operations, which may not be addressed in the shelter agreement, will be forwarded to the Emergency Management Director or EOC Manager for resolution.
10. Horry County Emergency Management, Horry County Schools (when applicable), DSS, and the American Red Cross will coordinate on demobilizing the evacuation and emergency shelters as quickly as possible post event. It is important to note that demobilization may need to occur within four to six hours upon notification of demobilization from HCEMD. It is necessary to re-open schools or resume normal operations for non-school facilities as soon as feasible to help to stabilize the community. As a general rule schools will not be used for post-hurricane sheltering.
11. Following each hurricane season, Horry County Emergency Management will review the current shelter list and determine any changes that need to be made and implemented before the next hurricane season. For specifics on shelter management and operations during pandemics, please see the American Red Cross shelter management plan.

Horry County Hurricane Shelters 2024

Main Shelters

CTN- Critical Transportation Need – Execute Bus routes with Pick-up Points

Shelter	20 Sq. Feet	60 Sq. Feet	110 Sq. Feet
Aynor Middle School	420	140	76
Conway High School	579	193	105
Loris High School	584	195	106
North Myrtle Beach High School	290	97	53
Ocean Bay Middle School (CTN) - Limited Routes (Non-Advertised)	356	119	65
Main Shelter Capacity	2229	744	405

Reserve Shelters

Aynor High School	398	133	72
Loris Middle School	420	140	76
Reserve Shelter Capacity	818	273	148
Total Shelter Capacity (Shelters & Reserve)	3047	1017	553

Additional Reserve Shelters During Pandemic Conditions

Whittemore Park Middle School	369	123	67
Green Sea Floyds High School	213	71	39
Black Water Middle School (CTN) – Limited Routes (Non-Advertised)	536	179	97
Additional Reserve Shelter For Pandemic Condition Capacity	1118	373	203
Total Shelter Capacity (All Shelters Totalled)	4165	1390	756

Critical Transportation Needs Evacuations

In the event the hurricane is forecasted to be a category 2 or higher storm Horry County will not be capable, due to structural limitations in the current shelter list, to open shelters in Horry County. This plan will address the needs of those residents in mandatory evacuation zones in Horry County without available transportation to public shelters outside of Horry County. These evacuees will be known as Critical Transportation Need Evacuees (CTN) and Horry County’s ESF 6 Mass Care Team (Horry County, CoastRTA, State Emergency Management Division, DSS, Red Cross, Horry County School District and Transportation Management Services) will work together to get these evacuees to public shelters in other counties. Likewise, Horry County’s ESF 6 Mass Care Team will work together to bring the CTN evacuees back to Horry County, once the Governor’s mandatory evacuation order has been lifted and the local jurisdictions have deemed the areas safe.

The planning number for CTN evacuees is 1000. This number was determined by reviewing sheltering numbers and evacuation compliance from both the 2016 and 2018 Hurricanes seasons, in which CTN shelter numbers never topped 250 people. The timing of the CTN evacuation process is crucial. Evacuation of the CTN population has to be completed well before the arrival of tropical-storm-force winds on the coast.

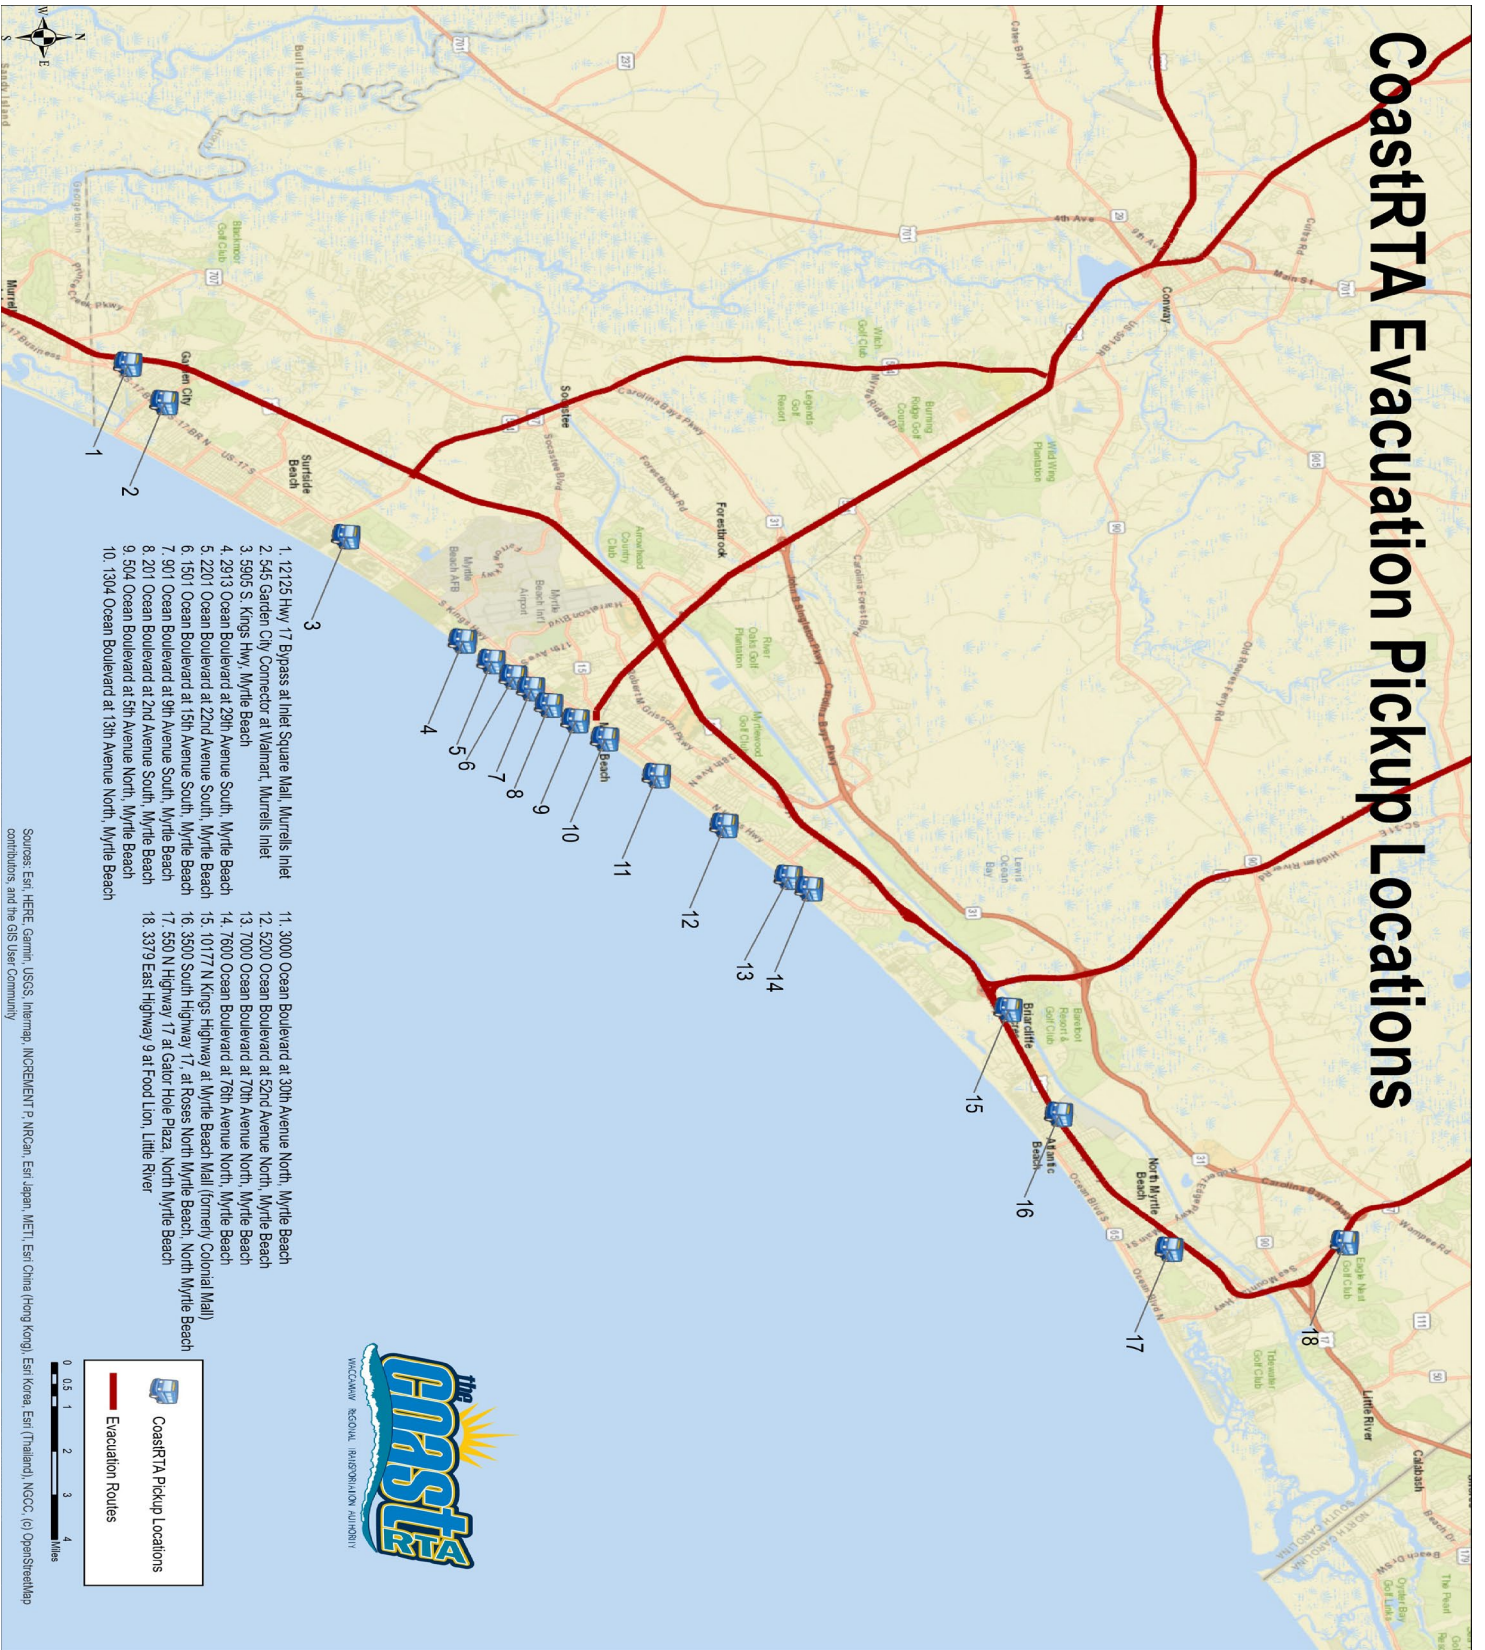

The plan below assumes the collection point facility referenced in the below-planning document will be Ocean Bay Middle School located at 905 International Drive, MB SC 29579. Horry County Government has obtained an agreement with Horry County School district to use this facility for this purpose.

It is understood that CTN evacuation will take longer and require more resources for CTN operations during pandemics. Horry County has coordinated with the ESF 6 Mass Care team for planning to ensure those needs and additional steps are in place.

1. Discussions regarding CTN evacuation will begin as soon as there is a recognized threat of storm surge in Horry County. These discussions will include the current forecast, potential impacts to evacuation zones, and anticipation of when a mandatory evacuation order may be issued.
2. Coordination between, Horry County, SCEMD, CoastRTA, Red Cross, SC Department of Social Services and the School District will begin to occur prior to the anticipated evacuation start time and during any evacuation process. Special care will be taken to ensure the evacuation time window will allow for the CTN evacuation to finish prior to the arrival of tropical storm force winds on the coast.
3. Horry County will request CTN resources from the State Emergency Operations Center 60 hours in advance of the start of evacuations and will forward-stage those assets, pre-evacuation order, at Carolina Forest Recreation Center (2254 Carolina Forest Blvd MB, SC 29579). Horry County will provide 24-hour security on site at the forward-staging location. For operations, occurring during pandemic conditions Horry County will need to request CTN resources from the State Emergency Operations Center 80 hours in advance of the start of evacuations.
4. Once an evacuation order goes into effect CoastRTA will use their pre-determined routes to do pickups of CTN evacuees in the evacuation zone. A list and map of these established pick up points is available year round on CoastRTA’s website and will be messaged at the time of the event. (See Attachment D)
5. CoastRTA will manage the coordination of pickups both along the predetermined route and for any CTN evacuees who have disability needs and are unable to make it to those points.
6. CTN evacuees will be transported by CoastRTA to the collection point (Ocean Bay Middle), which will be run by SCEMD & Transportation Management Services. Additional coordination and assistance at the collection point (Ocean Bay Middle) will be provided by Red Cross and the Department of Social Services.
7. Horry County will provide an onsite liaison for coordination, law enforcement for security and traffic control, and an onsite medic unit for support of the state managed collection point (Ocean Bay Middle). HC employees will staff CP Manager Position, Security, and a Medical Station.
8. Once CTN evacuees are dropped off by CoastRTA at the collection point (Ocean Bay Middle), they will be directed by CTN staff to proper screening, processing, and registration areas at the facility.
9. CTN evacuees, once processed, will be assigned to motor coaches that will take them to host-county shelters for the duration of the event.
10. Horry County will utilize the ESF 6 (Red Cross and Department of Social Services) representatives in the EOC to maintain situation awareness of the CTN evacuees at the host-county shelters.
11. Prior to the Governor rescinding the evacuation order, Horry County will be working with SCEMD, TMS, Red Cross, and DSS to coordinate repatriation of the CTN evacuees to Horry County.
12. Once the Governor rescinds the evacuation order and the area has been deemed safe by the local jurisdictions the return process will be initiated.
13. SCEMD and Transportation Management Services will manage the repatriation of the CTN evacuees. Assistance and support will be provided by ESF 6. (Red Cross & Department of Social Services)

14. CTN evacuees at host-county shelters will be screened, processed, and assigned to motor coaches that will return them to the Horry County collection point* for transfer to CoastRTA shuttles. (*If the collection point for repatriation will interfere with the facilities return to normal operations or if post-storm shelters have been established, an alternate facility from the pre-storm collection point may need to be identified.)
15. When CTN evacuees arrive at the Horry County collection point (Ocean Bay Middle), SCEMD and Transportation Management Services will manage and direct CTN evacuees to CoastRTA shuttles, which will run return routes to the original pickup points or post-storm shelters if they have been established and the evacuee chooses this option.
16. During repatriation, Horry County will provide an onsite liaison for coordination, law enforcement for security and traffic control, and an onsite medic unit for support of the state-run collection point (Ocean Bay Middle).
17. CoastRTA will manage the coordination of return route drop-offs along the predetermined routes in the evacuation zones.
18. As soon as the last evacuees have left the collection point, demobilization of that site will occur.
19. Following each hurricane season, Horry County Emergency Management will review the CTN Evacuations attachment and determine if any changes need to be made and implemented before the next hurricane season. For specifics on operations of the Critical Transportation Need Collection point, please see the South Carolina Emergency Management Hurricane Annex for specifics.

CoastRTA Evacuation Pickup Locations

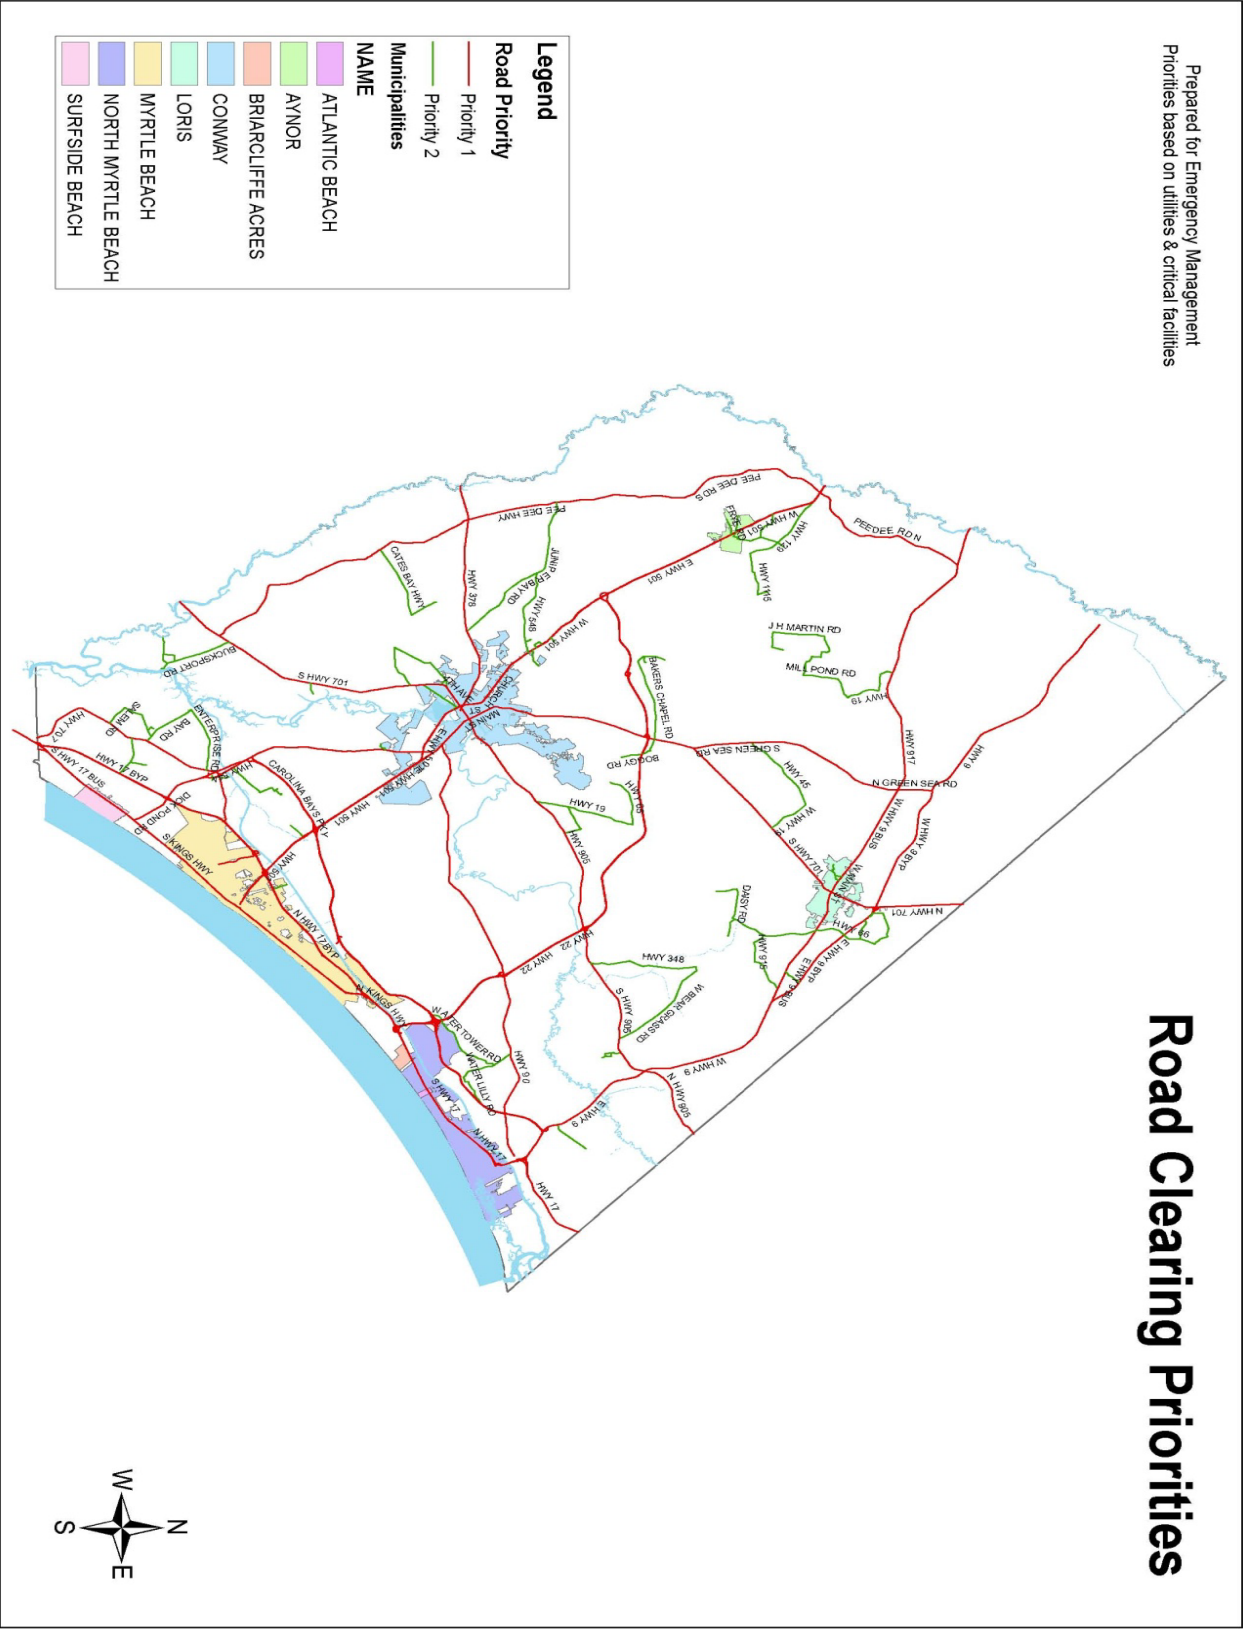

1. 12125 Hwy 17 Bypass at Inlet Square Mall, Murrells Inlet
2. 245 Garden City Connector at Walmart, Murrells Inlet
3. 3905 S. Kings Hwy, Myrtle Beach
4. 2913 Ocean Boulevard at 29th Avenue South, Myrtle Beach
5. 2201 Ocean Boulevard at 22nd Avenue South, Myrtle Beach
6. 1501 Ocean Boulevard at 15th Avenue South, Myrtle Beach
7. 801 Ocean Boulevard at 8th Avenue South, Myrtle Beach
8. 201 Ocean Boulevard at 2nd Avenue South, Myrtle Beach
9. 504 Ocean Boulevard at 5th Avenue North, Myrtle Beach
10. 1304 Ocean Boulevard at 13th Avenue North, Myrtle Beach
11. 3000 Ocean Boulevard at 30th Avenue North, Myrtle Beach
12. 5200 Ocean Boulevard at 52nd Avenue North, Myrtle Beach
13. 7000 Ocean Boulevard at 70th Avenue North, Myrtle Beach
14. 7800 Ocean Boulevard at 78th Avenue North, Myrtle Beach
15. 10177 N Kings Highway at Myrtle Beach Mall (formerly Colonial Mall)
16. 3500 South Highway 17 at Roses North Myrtle Beach, North Myrtle Beach
17. 550 N Highway 17 at Calor Hole Plaza, North Myrtle Beach
18. 3379 East Highway 9 at Food Lion, Little River

SCEMD’s Evacuation Compliance Worksheets

Horry County Vulnerable Population*	
Evacuation Zone	Total Population
A	11,319
A-B	26,929
A-B-C	98,861
Not in Evacuation Zone	213,920
Total	351,029

Instructions for completing the Evacuation Compliance Worksheet:

Step 1: Enter the appropriate point value for rows A through E (storm intensity, storm track, storm angle of approach to coastline, storm trend, and NWS storm surge watch/warning).

Step 2: Add the point values in rows A through E, and enter the total point value.

Step 3: Compare the total point value in the worksheet with the closest corresponding point value in the conversion table to determine the evacuation compliance level and compliance level percentage.

Evacuation Compliance Worksheet						
Evacuation Compliance Factor	Evacuation Compliance Sub-Factors and Point Values					Enter Appropriate Point Value
Row A:						
Storm Intensity	CAT 1= 5 pts	CAT 2= 10 pts	CAT 3= 15 pts	CAT 4= 20 pts	CAT 5= 25 pts	
Row B:						
Storm Track	From the southwest= 5 pts		From the south= 10 pts		From the southeast= 15 pts	
Row C:						
Storm Angle of Approach to Coastline	Parallel to coast/on shore= 5 pts	Parallel to coast/off shore= 10 pts	45° angle to coastline= 15 pts	90° angle to coastline= 20 pts		
Row D:						
Storm Trend*	Decreasing Threat= 0 pts		No Change in Threat= 10 pts	Increasing Threat= 20 pts		
Row E:						
NWS Storm Surge Watch/Warning**	No Storm Surge Watch or Warning= 0 pts	Storm Surge Watch= 10 pts		Storm Surge Warning= 20 pts		
						Total Point Value:

* Based on the three (3) most recent National Weather Service (NWS) advisories

** NWS may issue a storm surge watch at H-48 and a storm surge warning at H-36

Conversion Table		
Total Point Value	Evacuation Compliance Level	Percentage of Compliance Level
0 pts	None	0%
25 pts	Low	25%
50 pts	Moderate	50%
75 pts	High	75%
100 pts	Maximum	100%

CAT 2/CAT 3				3%	
CAT 4/CAT 5				5%	

Instructions for completing the Estimated CTN Population Worksheet:

Step 1: Complete the Evacuation Compliance Worksheet.

Step 2: Identify the applicable storm intensity (Column A) based on the current weather advisory.

Step 3: Enter the evacuation zone population in Column B* in accordance with the county’s vulnerable population data.

Step 4: Enter the compliance level percentage in Column C* based on the results obtained in the Evacuation Compliance Worksheet.

Step 5: Multiply Evacuation Zone Population (Column B) times the Compliance Level Percentage (Column C), and enter the total in Column D*.

Step 6: Multiply the Evacuation Compliance Population (Column D) times the Estimated Percentage of Evacuating Population that are CTN Evacuees (Column E), and enter the total in Column F*.

*Ensure that the entry corresponds with the applicable storm intensity row.

ATTACHEMENT G
